

ILA Series Installation Guide

This procedure is designed as an installation aid. Skilled tradespeople that are familiar with general construction and electrical installation techniques should perform the installation. Licensed electricians should provide electrical installation connections. Installations and connections should be done in accordance with all national and local codes and permits. In no way is this document intended to construe warranty or fitness of use of the products described, nor is it intended to provide safety instruction for those installing the product.

Installation Procedure

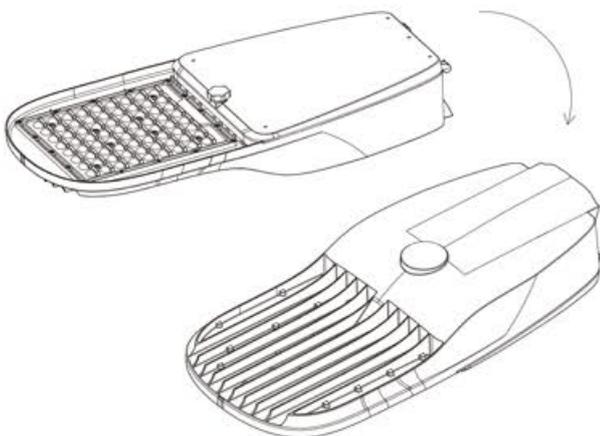

1. Loosen the thumb screw and open the fixture cover.

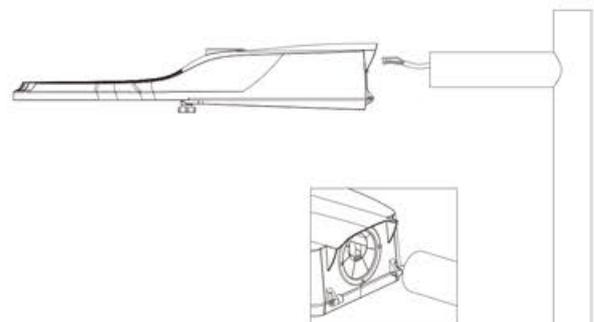

2. Loosen the 4 of hoop screws (don't unscrew all out).

3. Turn the fixture upside down so that the LED reflector is facing down when the fixture is installed.

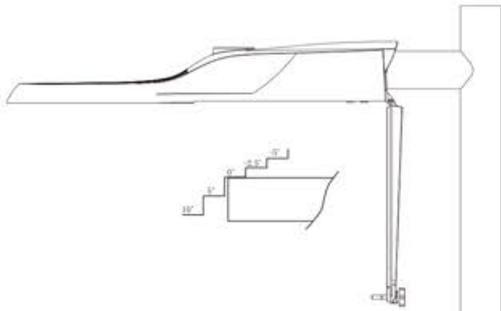

4. The pole is inserted into the fixture body and placed on the angle step of the fixture body.

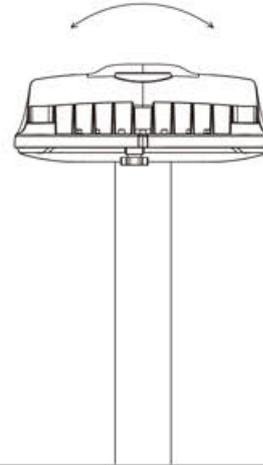

ILA Series Installation Guide

5. There are 5 angle steps on the fixture body, which are -5° , -2.5° , 0° , 5° and 10° respectively. Put the fixture on the appropriate angle steps.

6. Rotate the fixture body to make sure that the left and right are even (check the level measure).

7. Tighten 4 hoop screws (torque 8-10 N.m).

8. Cover the fixture cover and tighten the thumb screw to complete the installation.

WARNING

Before proceeding with installation or service maintenance of this product.

- Disconnect power to reduce electrical shock risk.
- Review the entire Installation Guide.
- Inspect this properly packaged product for any damage that may have occurred during transit.
- Verify product application complies with manufacturer design recommendations.
- Verify the availability of necessary tools and incidental material.
- Verify applicable code requirements. Field assembly and installation are subject to acceptance by local inspection authority.
- Appropriate safety equipment to be determined by end user, per applicable safety standards and precautions.
